

## WEC TASK FORCE ON ROADMAP TOWARDS A COMPETITIVE EUROPEAN ENERGY MARKET

Tuesday 15 June 2010, 14<sup>00</sup>-18<sup>00</sup> hours  
Conference Center Neptun, Hall Tomis

### MODERATORS

- Victor Ionescu, OPCOM, General Manager
- Slav Slavov, World Energy Council, Regional Manager for Europe and Central Asia

### OBJECTIVES

1. To develop a roadmap towards a competitive European energy market, including renewable energy sources
2. To formulate the prerequisites for a successful liberalised market
3. To define milestones in order to benchmark the progress towards a liberalised market, including a harmonized methodology to incentive the non-mature technologies, dealing with generation costs and grid integration

### SCOPE OF THE WORK

- ❖ Conditions for an efficient market and comparison with current deficits, including that for renewable energies (e.g. transparency, grid access, market access, ...)
- ❖ Market integration: Role and importance of sub-regional markets as an intermediate step towards a single European market
- ❖ Compatibility with national energy policies
- ❖ Advantages and challenges for energy customers (efficiency gains, development of retail markets)
- ❖ How to measure competition and market power?
- ❖ The role of regulators and administration: the ideal regulator (national vs. regional, regulatory functions, ...)
- ❖ Future of the current non-liberalised parts of the market (renewable energy, CHP)

### INVITED SPEAKERS:

- Romanian companies involved in the electricity market
- Members of the Study Group
