## Intra-Day Market – Trial Period SIDC

**OPCOM S.A.**

Source: [Presentation](#) from 2nd Wave Pre-Launch Event of the Single Intraday Coupling (SIDC) - which took place on the 1st October 2019 in Prague.

## SIDC Market Trial (1)

### What is the Market Trial?

- The Market Trial Period gives the Market Participant the **opportunity to connect via Local Trading Systems (LTS) of the NEMOs to the SIDC system**
- **The Market Trial Period is locally organized by individual NEMOs/TSOs** – NEMOs and TSOs (for Explicit Market Participants) are the main communication interface for both technical and organizational matters – **connectivity details and credentials will be communicated locally**
- Mainly focused on the new Implicit and Explicit Market Participants, but **all** market participants are invited and encouraged to join
- The Market Trial will be conducted in **production-like conditions**, meaning that following items are configured in accordance with the foreseen go-live configuration:
  - product range
  - product naming and product scheduling
  - cross-border capacities publication times,
  - coupling perimeter.

## SIDC Market Trial (2)

- **Goal:** to become familiar:
  - With **SIDC functionalities and process** – applicable for the Market Participants who are not using SIDC services yet
  - With the new features introduced in the 2nd XBID release – applicable for the Market Participants already actively participating in the SIDC (provided that their respective NEMO participates in the Trial Period),
  - **Post-coupling activities like nominations are out of scope** of the Market Trial.
  - Note: The Implicit Market Participants have access to SIDC via the **Local Trading Solution which may differ among NEMOs** as it may also have additional functions supporting individual processes
- **Period of execution:**
  - 1<sup>st</sup> timeslot: 21/10/2019 - 25/10/2019
  - 2<sup>nd</sup> timeslot: 28/10/2019 - 02/11/2019
  - Note: **Activation of the timeslot is the full responsibility of the SIDC project.** The goal is to execute all related scenarios within the first timeslot.
- **ALL NEMOs with the exception of EPEX Spot will participate in the Market Trial Period.**

## SIDC Market Trial (3)

- **Operating times:**

- The IT System will be operating on a 24x5 basis during the Trial Period.
- The support services (operational and technical consultation, simulation of the predefined scenarios) will be provided between 9am and 5pm CET by NEMOs for Implicit Market Participants and by TSOs (HOPS, ELES, RTE, Amprion) on the respective borders for Explicit Market Participants.
- All requests for support or consultation outside of the supported times are the responsibility of each of the NEMOs.

- **Technical arrangements:**

- Implicit Market Participants – are fully the responsibility of each NEMO
- Explicit Market Participants – are within the responsibility of the respective TSOs (HOPS, ELES, RTE, Amprion) – connectivity data distribution, connectivity tests, manuals for Explicit MPs, ...

- **Operational Messages:**

- The purpose of the Trial Period is to simulate operation as close as possible to the standard production operation. This implies that the system will generate operational messages. The Market Participants shall be advised to distinguish between messages coming from the Trial Period and those coming from routine operations.

## SIDC Market Trial (4)

### Detailed Schedule:

- **Week 43 (21/10/2019 - 25/10/2019)**
  - Mo 21.10.2019 Normal operations
  - Tu 22.10.2019 Normal operations + Closing of HU market
  - We 23.10.2019 Normal operations + Trade recall and trade cancellation + Closing of market(s)
  - Th 24.10.2019 Normal operations + Trade recall and trade cancellation + Closing of borders
  - Fr 25.10.2019 XBID not available
- **Week 44** – Reserved for additional Trial Period testing if activated by the SIDC project

**Normal operations** = testing against production-like products

**Trade recall and trade cancellation** = For and between the NEMOs offering the service

**Closing of market(s)/borders** = simulations of situations where specific messages will be communicated, specific local NEMO processes in local trading systems might be proposed
