

## **Focus on Energy 3rd edition**

October 17, 2012, Howard Johnson Hotel, Platinum Hall

Representatives of energy firms and public authorities, along with consultants and financiers are set to debate the efficient solutions for Romania's energy sector, in this year's edition of Focus on Energy organized by Business Review. Energy specialists will gauge the impact of the recently approved gas and power law on the Romanian market and then status of Romania's energy strategy. Panelists will look at the ways to finance the Romanian energy sector during a period marked by uncertainties for the banking industry. The cost and benefits of smart grids will also be analyzed by industry players. Romania has started to replace old power generation capacities, but needs to accelerate infrastructure development.

9.00 – 11.00 1<sup>st</sup> session

### **Topics:**

1. Implementing the legislation on electricity from renewable energies and transposition of the third legislative package into Romanian law
2. Law 123/2012 – implications of the provisions on forms of ownership of Romanian energy companies
3. Impact of Law 123/2012 on energy trading in Romania
4. Status of Romania's energy strategy
5. Solutions for the speed gap between new generation capacity construction and infrastructure development
